

Machine Shop

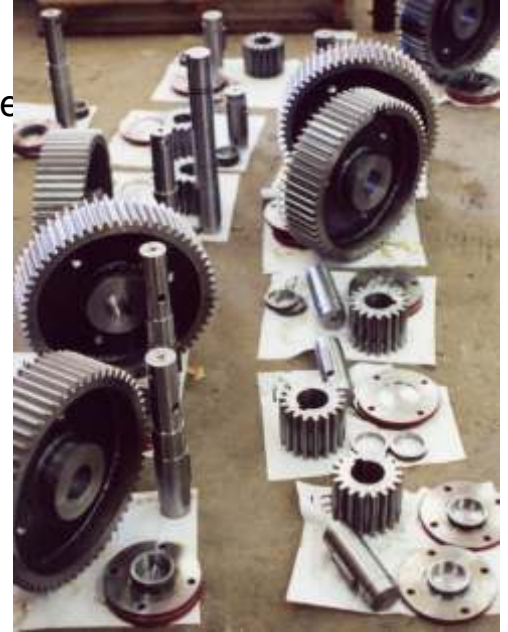

In our Machine Shop we have a wide variety of equipment that will help us do your job. The Machine Shop can turn shafts, make bushings, collars, and keys. It is also capable of machining larger and more detailed parts such as gears, gear boxes, grinder cutting heads, grinder feed rolls, also machining larger parts such as machine weldments.

Equipment:

- ✓ 5 Engine Lathes with the capability to machine small into parts to larger parts with a size of 3" x 120"
- ✓ 3" G&L Horizontal Boring Mill with 36" x 60" Table (Travels 36" High)
- ✓ 8" K&T Duplex Horizontal Boring Mill 72"x96"x96"
- ✓ 2 Vertical Mills
- ✓ 2 Horizontal Mills
- ✓ 36" Vertical Turret Lathe (Travels 24" High)

Layout of the Machine shop at Industrial Wood Products, LLC.

Precision made parts for a gear box. Everything from the gears, shafts, spacers, and even the main weldment are machined and fabricated at Industrial Wood

Precision Milling on a Hydraulic Ram.

Milling on a bin unloader weldment.

A 10,000 psi Hydraulic Bar Shear is being turned on a lathe.

Milling cutter seats on a grinder head.
